

Please do not weaken this law .These telephone calls have truly gotten out of control yes they have not been as many telephone calls but there are still some of these telephone people continue to call but I continue to hang up on them. However if this law does not stay in effect they will again continue to call at a high volume. My problem now is they have started to call my cell phone and I'm not at all happy about this being my cell phone is for emergency purpose only for my family.. Thank You Anne Marie Allegretti
